Welcome to hi-designs

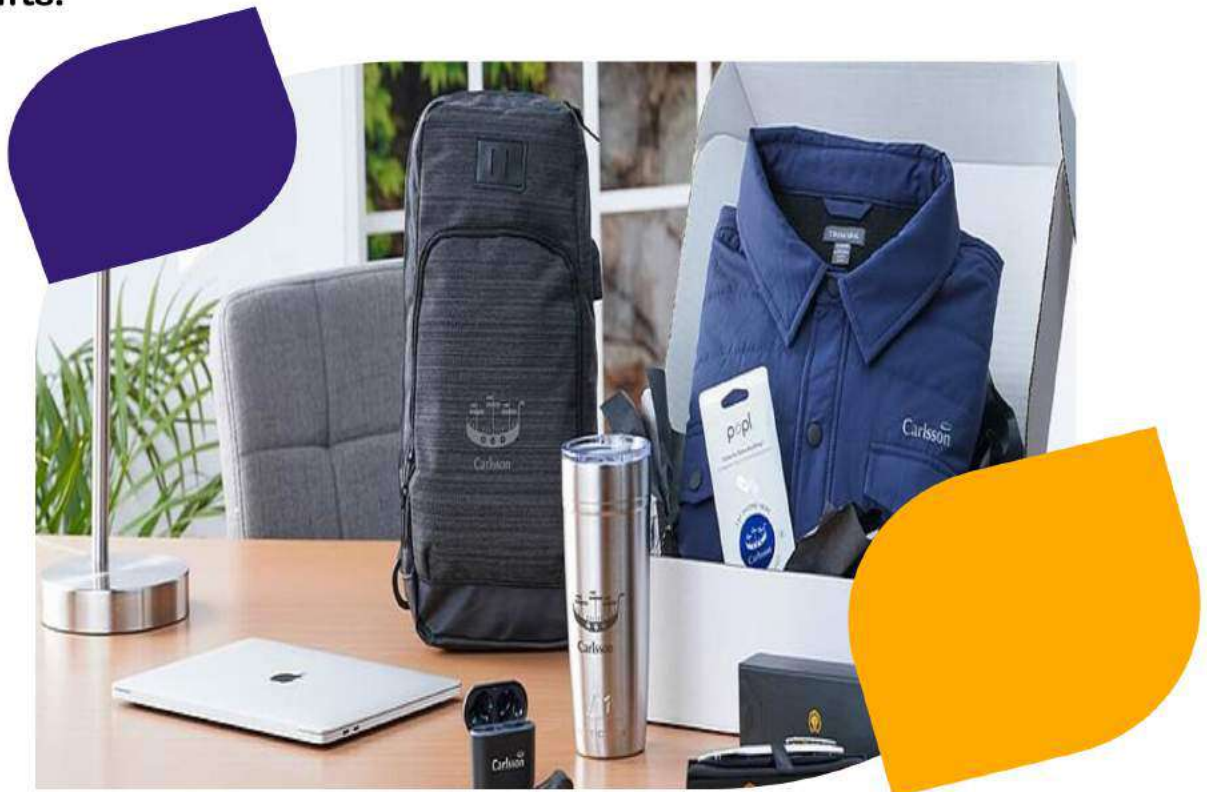

Hi-Designs was started with a vision: To bring stylish and functional products with an essence of India, to the world.

All large things start with some small situations. In our case, it happened when Roshan visited the famous white desert of Kutch in Gujarat. Kutch is also known for local handicraft products. His IISc batchmates clicked pics for Instagram but didn't buy anything. They said these products didn't fit modern sensibilities.

Thus, the idea of Hi-Designs was born. We realized a gap for stylish and functional modern products with an essence of India for the world.

And like every journey, we started with Unique Corporate Gifts.
